

**Prof. Colin Price**

## **Seminars program**

**Agripolis Campus  
DipTeSAF**

**Video-conference Room 2040, 2<sup>nd</sup> floor; TeSAF Department**

A series of seminars targeted to PhD students on some of the most relevant issues of forest economics: economic valuation of ecosystem services, with case studies on cost-benefit analysis of carbon sequestration, of disease damage and of water-related forest investments; the impact of discounting on long term investments; recent development of landscape economics; economic valuation and forest certification.

**Tuesday 11<sup>th</sup> November; 11.00-13.00**

Is discounting sustainable, or if not should sustainability be discounted?

**Tuesday 11<sup>th</sup> November; 14.30-17.00**

Effects of declining discount rate on optimal forest rotation  
Risk, discount premiums and rotation

**Wednesday 12<sup>th</sup> November; 9.00-13.00**

Economics of ecosystem services and disservices  
How to assess forest activities related to water cycle regulation?  
Can certification premiums give a value of ecosystem services of certified forests?  
Tree diseases assessment I

**Wednesday 12<sup>th</sup> November; 14.30-17.00**

Tree diseases assessment II  
How can carbon transactions be costed/priced?  
Carbon economics and its effect on forest activities.

**Thursday 13<sup>th</sup> November; 9.00-13.00**

The economic value of landscape

**Thursday 13<sup>th</sup> November; afternoon**

Available for discussions
